PROJECTS

Mindful AI **2026**

- **The Problem:** High-barrier to entry for mental health support and lack of real-time, "human-feeling" digital therapy.
- **The Solution:** Engineered a low-latency voice-to-voice therapist using Socket.io and WebSpeech APIs, creating a seamless bridge between human emotion and AI response.
- **The Impact:** Eliminated text-based friction by implementing real-time audio visualization and "Smart Interruption" logic, mimicking natural human conversation flow.

Hair-Cast AI **2025**

- **The Problem:** Unpredictable environmental damage to hair caused by Karachi's volatile humidity and pollution levels.
- **The Solution:** Built an "Edge-first" application integrating **real-time weather telemetry** with LLM-based chemical analysis to provide hyper-localized hair-care prescriptions.
- **The Impact:** Achieved <100ms response times using **Vercel Edge Functions**, delivering a secure, OWASP-compliant solution for thousands of potential users.

AI Resume Analyzer **2025**

- **The Problem:** The "Black Box" of ATS systems makes job hunting demoralizing for students.
- **The Solution:** Built a diagnostic tool using **Hugging Face** models to reverse-engineer resume scoring, providing actionable semantic feedback rather than just keyword counting.
- **The Impact:** Developed a multi-format parsing engine that identifies content gaps in grammar, action verbs, and achievement density for improved hiring outcomes.

Class Compass **2026**

- **The Build:** Developed a risk-aware academic suite with **predictive buffer modeling** to calculate "safe misses" vs. "must-attends" for NED students.
- **Impact:** Implemented a CGPA "What-If" engine and credit-hour weighted metrics, helping 100+ beta users avoid exam eligibility risks.

TECHNICAL EXPERIENCE & COMMUNITY

IBA Mental Health Hackathon (Finalist): **2025**
Pitched a sentiment-aware AI triage system to industry leaders from **SadaPay** and **Motive**.

GDSC NEDUET (Technical Lead): **2025**
Facilitated peer workshops on **n8n automation** and Python-driven workflow optimization.

EDUCATION

Bachelor in Computer Sciences & Information Technology **2027**
NED University of Engineering and Technology, Karachi, Pakistan

CERTIFICATIONS

- Full Stack Developer (FreeCodeCamp)
- Cloud & DevOPS (Coursera)

SKILLS

Core Skills: Data Structures & Algorithms (DSA), OOP, DBMS, Computer Networks, OS, System Design

Languages: Python, JavaScript (ES6+), C/C++

Frameworks: React.js, Next.js, Node.js, Tailwind CSS

Tools: Git, Docker, REST APIs, Web Scraping (BeautifulSoup/Selenium), AWS.
